

Cloud Terminal

**Contactless payments
anywhere,
without terminals.®**

Cloud Terminal empowers merchants and partners to rapidly deploy, certify, brand and distribute contactless payment solutions on smartphones, tablets and third party devices.

Cloud Terminal requires no dongle, terminal or PIN pad to process EMV transactions. Instead, Cloud Terminal activates the device's NFC reader to capture contactless payments and uses the touch screen as a secure PIN pad.

Enabling fast and secure NFC payments anywhere.

Contactless payments

Enables retail consumers to make fast and secure contactless EMV payments with Visa, MasterCard, Discover, Amex, Interac, Google Pay, Apple Pay and Samsung Pay.

Tap to phone payment solutions

Enables vendors and retail businesses to create highly scalable, downloadable, software only mobile point of sale payment solutions on consumer grade mobile and tablet devices.

Developer .sdk

Streamlines the adoption of EMV, accelerating time to market, reducing the compliance burden and enabling EMV payment services to be integrated in minutes, not months.
