

DUET MOBILE PAYMENT TERMINAL

The New All-in-One Mobile Point-of-Sale Solution

NMI has added the Duet, an Android-based contactless payment terminal, to the range of payment devices supported on the platform. This complete solution allows businesses to accept payments and print receipts anywhere, by combining hardware, software, and fulfillment services for a seamless, modern checkout experience.

FEATURES

- Accepts EMV contact / contactless / Apple Pay / Google Pay
- Bright and responsive 6.5" touchscreen
- Certified by NMI on TSYS for payment processing
- Front and rear cameras and optional barcode scanners
- Quad-core 2GHz processor for fast, smooth operation
- GSM, Wi-Fi and Bluetooth connectivity
- Visa and Mastercard accepted, with Amex and Discover, coming later in 2025
- Swappable high capacity battery pack gives very long life

BENEFITS

- Connect allows you to centrally manage your fleet of terminals, including distributing updates and remote diagnostics and troubleshooting.
- Using a dedicated portable device for point of sale is more trusted by cardholders than a mobile phone, and transactions are less likely to be interrupted by calls or message alerts.
- Access the App Centre to download third-party POS and ERP applications tailored specifically to your industry or market.
- Secure device architecture with remote operating system and app updates, ensures continued security and compliance with PCI DSS requirements.

Technical Specifications

Specifications are reproduced in good faith from the manufacturer's datasheet. Specification parameters critical to your application should be verified with the hardware distributor prior to purchase.

Architecture	Quad core 2GHz processor running Android 13 (Play Protect Certified)	✓
Display and Touchscreen	6.5" backlit colour, IPS, 720 x 1600 Capacitive multi-touch	✓
